Frequently Asked Questions about Diodes

1. What is the best Diode for personal use? **The best Diode for personal use depends on the type of EMFs you are exposed to on a daily basis. The Versatile Digital Diode is our most powerful Diode we make for personal protection.**
2. What combination of your products would provide the maximum protection against all sources both at home and away from home? **The best combination is the Dio-Mid and the Versatile Diode.**
3. Does the Versatile Diode cover *only* digital and wireless technology? **No, the Versatile Diode will also take care of analog frequencies.**
4. Will the Versatile Diode alone protect me from fluorescent lights? **Yes.**
5. What is the best Diode for a college computer lab and wifi covering the entire campus? **The Versatile Digital Diode would be your best protection in that environment.**
6. What is the range of protection from the Versatile Digital Diode? **When the Versatile Digital Diode is worn on the body the protection will extend 18" from the body. When it is placed on an appliance it will only neutralize the EMFs emitting from the appliance.**
7. Can I use a Versatile Digital Diode directly on my computer? **Yes.**

8. What is the difference between the Versatile Digital Diode and the Super Digital All Purpose Diode? **The Versatile Digital Diode covers digital, wireless and analog frequencies, where as the All Purpose Diode covers frequencies with digital and analog coverage only.**
